

## How to make some cheep styling of your Volvo early models 00-04.

To a cost of 10 euro

This yellow/orange soft led stripe with glue is mounted under the hood on the rubber list which is between hood and front of car. As it is under the hood you cannot see it before it start to flash. You connect left side to left turn signal lamp and the other to the right turn signal lamp in the front. Cheep cost 3,- euro each.

This led stripe with strong glue from factory is mounted under the cover which you can take away from the mirror, Connected to the side lamp as you can see on the picture. It is easy to apply, just loosen the mirror from inside so you can put in a small cable which comes from the side lamp and drill a very small hole in the plastic under the cover. A little tricky to open the side lamp as it is pllastic so be careful so you don't break the clips which hold the lamp. Cost 2,- Euro each side.
